What is Crypto Rebate?

Introducing Brokers (IBs) of cryptocurrency exchanges reward traders by crediting a percentage of their **paid commission** as cashback—this is also known as a rebate.

To receive **rebate**, traders must first identify a reliable IB offering the highest rebate percentage and register through their **referral link** on a **crypto exchange** or link an existing account to the selected IB.

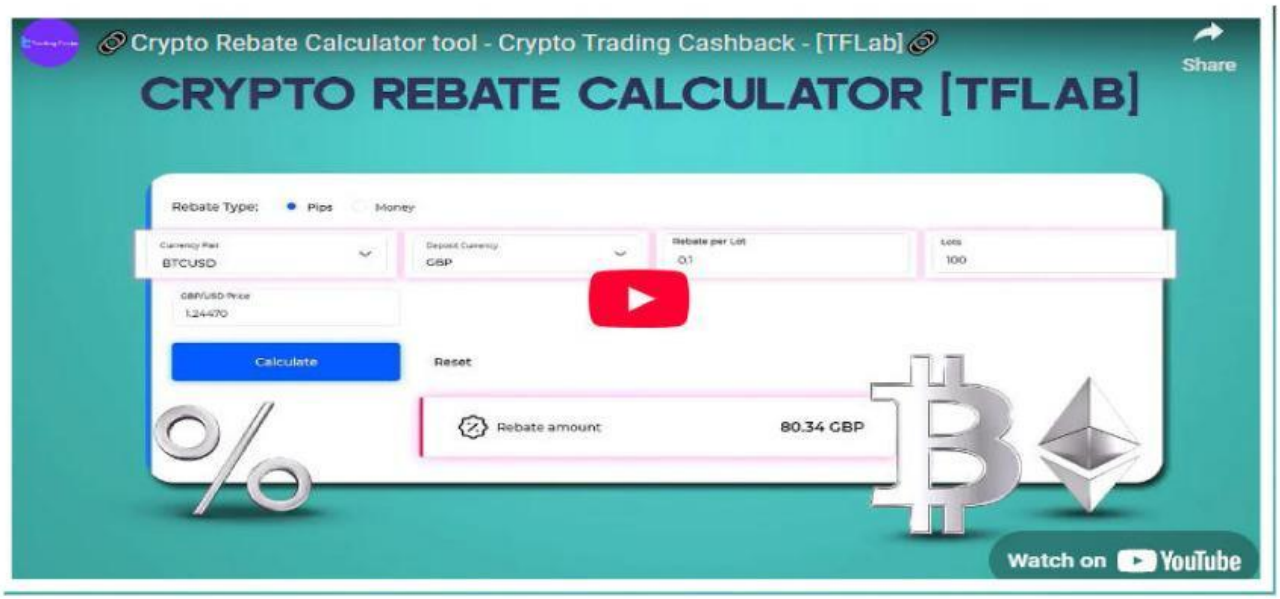

TradingFinder Crypto Rebate Calculator – A Tool for Estimating Cashback on Crypto Trades

Step-by-Step Guide to Using the Crypto Rebate Calculator

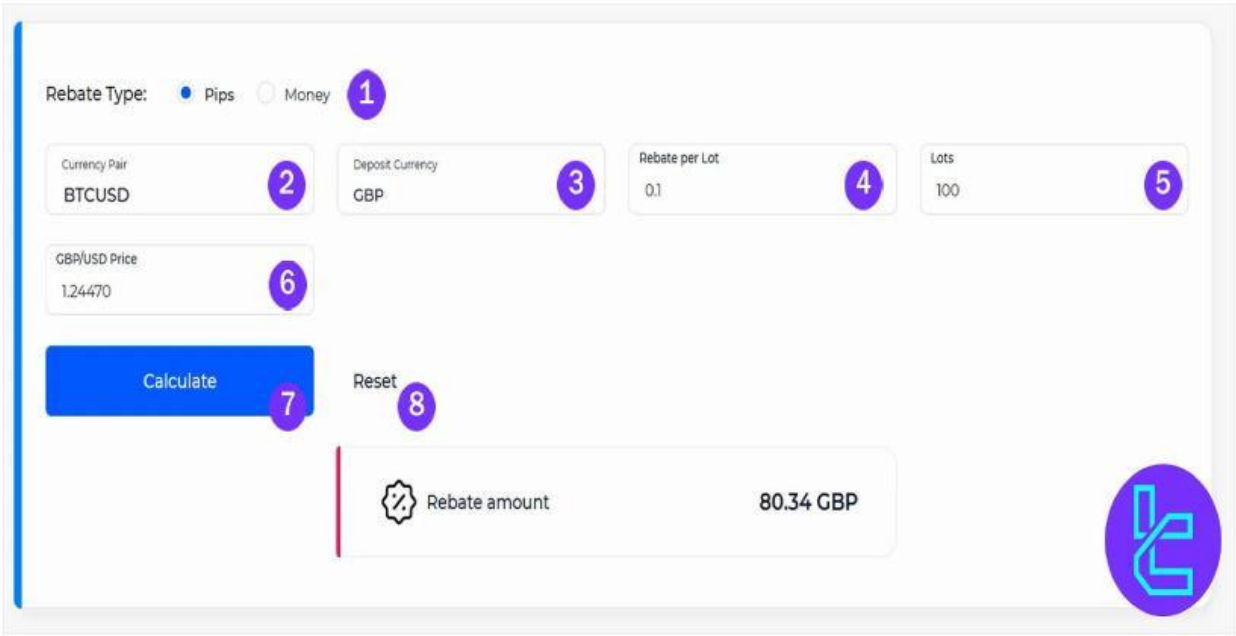

After registering through the IB referral link, enter your trading details and IB rebate plan information into the TradingFinder tool to quickly and accurately estimate your cashback amount.

Steps to use the TradingFinder Crypto Rebate Calculator:

LIVEWORKSHEETS

1. **Discount Type:** Choose between two rebate options—Pips or Money—based on the IB program;
2. **Trading Pair:** The calculator supports over 30 crypto trading pairs with USD, EUR, JPY, and AUD as base currencies (e.g., COM, FIL, BTC, ETH, XTZ, ADA, and TRX);
3. **Deposit Currency:** Select your account's base currency from 24 supported options, including KES, THB, TRY, EUR, RUB, HKD, and SGD;
4. **Rebate per Lot:** Input the rebate rate provided by the IB;
5. **Trading Volume:** Specify the number of traded lots on the selected crypto pair;
6. **Currency Conversion Rate:** Either fetch real-time conversion rates automatically or enter it manually;
7. **Calculate:** Click "Calculate" to instantly view your cashback amount;
8. **Reset:** Reset all entered values for new calculations.
