- You might get run over.
- You might get burned.
- You could get hit by the ball.
- You could get electrocuted.

Exercise 5: Read the text and circle the correct options: Zakrúžkuj správne odpovede:

Your multimedia computer

Welcome to your new multimedia computer. With this computer you can watch TV, listen to music, copy CDs, record your own voice, make videos and talk to your friends. Your computer comes complete with all the necessary hardware and software.

As well as the usual operating system programs, your computer comes with a number of additional programs which you can start by clicking on the icons (the small pictures) which you will see on your screen. You can make recordings on CDs or DVDs with EASYRECORD. There is also a video-editing program called TOPFILMS. For these programs there are teaching programs which you should look at before starting to use them. In addition, you can talk to your friends free of charge over the Internet using the excellent NETPHONE program. You will also find TVWATCH, which makes your computer work like an ordinary TV.

Of course, these programs also need the correct hardware. For all the programs the loudspeakers play all sounds automatically. However, if you don't want anyone else to hear your music, your TV programme, or your DVD, you need to plug in and switch on the headphones. The microphone is an external one so you need to connect it and switch it on before making recordings or talking to your friends by Internet phone. There is a DVD / CD reader / writer on the computer. If you want to record CDs or DVDs onto a disk, you must insert a new, unused disk in there.

You can film videos with the special video camera that comes with your computer. It uses a battery and has its own disk so you can record anywhere. To edit a film, first plug the camera into a USB connection. When you switch the camera on, TOPFILMS will know that it is connected and will tell you what to do to load the film into your computer.

Here you have everything you need for a complete multimedia experience. All you have to do is switch on and start enjoying your new computer.

- 1 What does the computer come with?
 - a hardware and software
 - b hardware, software, operating systems plus multi-media programs
 - c hardware, software and operating systems
- 2 What should you look at before using the multi-media programs?
 - a a CD
