15. Are there _____ eggs in the basket?

16. There are _____ books on the table.

IV. BLOCK: TRUE FALSE: Reading Comprehension: Read the text and answer the following questions. (2 marks)

Miguel and the Power of Languages

Once upon a time, there was a school called "School of Hope." in a quiet town. Although they didn't have access to cutting-edge technology, the teachers wanted to teach the digital-native children using the resources available. In the school, there were two teachers: Mrs. Laura and Mrs. Ana. Mrs. Laura, with more experience but less technological skills, sought the help of Mrs. Ana, who was younger and knowledgeable about technology. Together, they devised a plan to use the students' mobile phones as learning tools. They created a group chat where the main characters, Martín and Julia, would interact with the children. Martín was a curious boy and a science enthusiast, while Julia was a creative girl passionate about the arts. Through the group chat, the children could send messages and receive responses from the characters, keeping them interested and engaged in learning. Over time, Mrs. Laura learned to manage the group chat and respond to the students' messages. She overcame her initial insecurities and realized the effectiveness of this form of teaching using the available technology. "Hope School" became an example for other schools in the region. The teachers demonstrated that, even without access to advanced technology, they could effectively teach digital-native children using the available resources and adapting to their needs. With their willingness to learn and adapt, the teachers managed to engage the children in learning and showed that technology doesn't have to be cutting-edge to provide quality education

True or False:

17. Miguel became friends with the tourists because they spoke his language.
 True False
18. The tourists helped Miguel learn new words in their language.
 True False
19. Miguel was not interested in other cultures or languages.
