

Read the story and answer the following questions.

My Visit to the Dentist

Yesterday, I went to the dentist for a regular check-up. The dentist checked my teeth carefully and said I have no cavities. She told me that brushing twice a day and flossing regularly helps prevent tooth decay. She also explained that sugar can cause cavities, so it's important to eat sweets in moderation.

The dentist cleaned my teeth using a special tool to remove plaque and tartar. She said that regular cleaning helps keep gums healthy and prevents gum disease. The dentist's office was very clean and bright. The waiting room had magazines and a TV.

I think the dentist is very friendly and explains everything well. Some people say that going to the dentist is scary, but I don't feel that way.

After the appointment, I bought a new toothbrush and toothpaste. I believe this dentist is the best in town because she helps me keep my teeth healthy.

Identify if the argument is a fact or an opinion.

Some people say going to the dentist is scary.	Fact	Opinion
Brushing twice a day and flossing regularly help prevent tooth decay.	Fact	Opinion
I think the dentist is very friendly.	Fact	Opinion
Sugar can cause cavities, so sweets should be eaten in moderation.	Fact	Opinion
Regular cleaning helps keep gums healthy and prevent gum disease.	Fact	Opinion
