29.	A. free	B. lonely	C. alone	D. busy
30.	A. room	B. family	C. study	D. classmates

V. Read the passage:

You can put most fires out with water extinguishers. However, you should not use water extinguishers if the fire involves electrical equipment or if it has been started by flammable liquids such as petrol or paraffin. As in all fires, make sure that the wind is behind you – if you do this, the smoke will blow away from you. Point the jet of water at the bottom of the fire and move it slowly higher.

Remember that you should only use water extinguisher for small fires. If there is any danger of the fire spreading to anything that can explode – a gas cylinder for example – you should not try to put the fire out yourself. Instead, leave the building immediately and call the fire brigade.

A. Decide the sentences True or False: (1pts)

25. Water extinguishers should be used if the fire involves electrical equipment.
26. Make sure the wind is behind you so that the smoke will blow away from you as in all fires.
27. In case there is a fire, point the jet of water at the top of it.
28. You can put small fires out yourself in most cases.

B. Choose the best answer to each of the following questions (0.5 pts)

29. Water extinguisher can be used

LIVEWORKSHEETS
