Some basic concepts :

- A clock helps us to know the time.
- There are 24 hours in a day.
- It has two hands that shows time, the short hand shows hours and the long hand shows minutes.
- The short hand (hour hand) takes an hour to move from one number to another i.e. 1 hour = 60 minutes.
- The long hand (minute hand) takes 5 minutes to move from one number to another i.e. 1 minute = 60 seconds.

In the above clock, the short hand is at 3 and long hand is at 12. So, the time is 3 o'clock.

Now, tell the time in the clocks shown below :

| o'clock | o'clock | o'clock | o'clock |
