

## ACTIVITY FOR AUDITORY LEARNER

1. What is the main idea of the text?
  - A. Factories should stop producing goods
  - B. Economic growth is more important than the environment
  - C. Industrial development must be stopped immediately
  - D. Industrial development should be balanced with environmental care
  - E. We must rely on fossil fuels to grow industries
2. According to the text, what happens if industrial practices do not change?
  - A. Technology will stop developing
  - B. The economy will collapse
  - C. Pollution will decrease
  - D. The environment and human health will suffer
  - E. Factories will stop working
3. What gases are mentioned as harmful emissions from factories?
  - A. Oxygen and nitrogen
  - B. Carbon dioxide and sulfur dioxide
  - C. Methane and hydrogen
  - D. Chlorine and helium
  - E. Nitrogen oxide and water vapor

4. What is the suggested solution to reduce air pollution from factories?

- A. Increase fossil fuel use
- B. Encourage factories to work longer
- C. Use cleaner technology and renewable energy
- D. Build more factories in cities
- E. Reduce product prices

5. How do industries contribute to water and soil pollution?

- A. By planting too many trees
- B. By using too much electricity
- C. By dumping waste into rivers, oceans, and landfills
- D. By building homes for workers
- E. By recycling all materials

6. What kind of waste is often produced by industries?

- A. Food waste
- B. Organic compost
- C. Plastic, chemicals, and toxic materials
- D. Clothes and electronics
- E. Paper and cardboard only

7. Why is it important for companies to manage their waste?

- A. To increase profits
- B. To avoid producing anything
- C. To protect soil and water from contamination
- D. To sell more products

E. To close their factories

8. What could happen if industries continue to overuse natural resources?

A. Natural resources will increase

B. Factories will become greener

C. Future generations may face shortages

D. Animals will multiply

E. Rainfall will stop completely

9. What is a "circular economy practice" mentioned in the text?

A. Throwing waste in circles

B. Reusing and recycling resources to reduce waste

C. Building round-shaped factories

D. Using only fossil fuels

E. Ignoring environmental laws

10. According to the text, who should support green industry practices?

A. Only governments

B. Only large companies

C. Everyone: governments, businesses, and individuals

D. Only scientists and engineers

E. Only young people
