

How We Use

@studywithRosie

Artificial Intelligence, or AI, is becoming an important tool in our lives. People use AI to help them learn, work, and solve problems. We see AI in many places—on our phones, in cars, and even in homes.

One of AI's benefits is to help people study conveniently. For example, it can answer questions, translate languages, and update information quickly.

Many companies also use AI to do jobs faster. It can check documents, help customers online, and keep track of data. AI also helps doctors, teachers, and workers in many fields.

AI can make life easier. Some young adults make use of Chat GPT – a famous AI website to suggest some ideas about shopping lists, or planning trips.

AI is not perfect, but it is useful. It saves time and helps people do things better. In the future, AI may become even smarter and help us in new ways we can't imagine yet!

A. Fill in the blanks, using words in the box

technology – easier – respond – common – information – quickly – support – smarter - homes – helpful

Artificial Intelligence, or AI, is a type of _____ that many people use today. It is now very _____ to see AI in our daily lives. We can find it in phones, cars, and even in our _____.

AI is very _____ because it can make learning tasks simpler. It helps students learn new things, find _____, and _____ to questions. It can also translate different languages and update things _____.

Many companies use AI to do work more efficiently. AI can _____ customers, read and check papers, and keep important data safe. People in different jobs like doctors and teachers also benefit from it.

Some people use tools like Chat GPT to make life _____. They ask for advice about trips, shopping, or writing.

AI still has some limits, but it keeps improving. In the future, it may become even _____ and help us in ways we don't know yet.

B. Find the synonyms (words with the same meaning) of the given words, using information from the texts.

1. popular =

6. necessary =

2. beneficial =

7. add the most recent information =

3. answer the questions =

8. reply =

4. fast, simply and easy =

9. assist =

5. help =

10. fix
