1.- Escribe qué número está representado.

|                                                                                    |                                                                                    |                                                                                     |
|------------------------------------------------------------------------------------|------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|
|   |   |   |
|                                                                                    |                                                                                    |                                                                                     |
|  |  |  |
|                                                                                    |                                                                                    |                                                                                     |

2. Escribe como se leen los siguientes números.

|            |  |
|------------|--|
| <b>478</b> |  |
| <b>823</b> |  |
| <b>709</b> |  |
| <b>965</b> |  |

3. Descompone los siguientes números.

$$367 = \boxed{\phantom{000}} + \boxed{\phantom{000}} + \boxed{\phantom{000}}$$
$$\boxed{\phantom{00}} \text{ C } + \boxed{\phantom{00}} \text{ D } + \boxed{\phantom{00}} \text{ U }$$

$$725 = \boxed{\phantom{000}} + \boxed{\phantom{000}} + \boxed{\phantom{000}}$$
$$\boxed{\phantom{00}} \text{ C } + \boxed{\phantom{00}} \text{ D } + \boxed{\phantom{00}} \text{ U }$$

4. Compara los números y arrastra el signo que corresponde.

|     |  |     |
|-----|--|-----|
| 123 |  | 321 |
| 450 |  | 405 |
| 725 |  | 725 |
| 368 |  | 378 |

|   |
