

The Bird of Paradise (Cendrawasih)

The bird of paradise, or *cendrawasih* in Indonesian, refers to various species of birds from the *Paradisaeidae* family. These birds are native to eastern Indonesia, Papua New Guinea, and parts of Australia. They are best known for their striking plumage and elaborate courtship displays.

Birds of paradise vary in size and color depending on the species. Most males have brightly colored feathers in shades of yellow, green, red, and blue, along with unique feather structures such as long tail plumes or fan-shaped crests. Females are usually smaller and duller in color, which helps them hide while nesting.

These birds live in tropical rainforests and usually inhabit the canopy layer. They feed on fruits, insects, and small invertebrates. During mating season, the males perform complex dances, accompanied by vocal sounds and feather displays, to attract females.

Birds of paradise play a key role in seed dispersal and insect control in their habitats. They are also culturally significant in Papua, where they appear in traditional clothing and art.

Many species of bird of paradise are threatened by habitat loss and illegal wildlife trade. Conservation actions, such as habitat protection and awareness campaigns, are essential to preserve these magnificent creatures.

Matching Statements with Similar Meanings (Synonym Style)

Instructions: Match each statement in **Column A** with its closest meaning in **Column B**.

Column A (Text Statement)

1. Birds of paradise are known for their striking plumage.

2. They inhabit the canopy layer of tropical rainforests.

3. Males perform dances and feather displays to attract females.

4. Birds of paradise help in seed dispersal.

5. Many are threatened by habitat loss and wildlife trade.

Column B (Similar Meaning)

A. They are important for spreading seeds.

B. They have colorful feathers that stand out.

C. They do courtship shows to impress mates.

D. They live in the upper parts of the forest.

E. They face danger because their homes are destroyed and they are hunted.

Choose the correct answer

1. What is the main idea of the first paragraph?

- A. Birds of paradise are often used in ceremonies.
- B. They are tropical birds with special feathers and dances.
- C. Some birds live in cold places like the mountains.
- D. Birds of paradise fly far during migration.
