

Selesaikan persamaan linear
serentak dengan kaedah penghapusan.

$$\begin{array}{rcl} \textcircled{a} & x + 7y = 5 & \text{---} \textcircled{1} \\ & x + 2y = 10 & \text{---} \textcircled{2} \end{array}$$

Gantikan $y = \square$
ke dalam $\textcircled{1}$

$$\square = \square$$

$$\square = \square$$

$$\square = \square$$

$$x + 7y = 5$$

$$x + \square = \square$$

$$x = \square$$

$$x = \square$$

$$\begin{array}{rcl} \textcircled{b} & 3x - 2y = 2 & \text{---} \textcircled{1} \\ & x + 2y = 6 & \text{---} \textcircled{2} \end{array}$$

Gantikan $x = \square$
ke $\textcircled{1}$

$$3(\square) - 2y = 2$$

$$\square = \square$$

$$\square = \square$$

$$\square = \square$$

$$\square = \square$$

$$\square = \square$$
