Your next destination is Rwanda, Africa, to see the (3)_____. You have to be very quiet in front of them. Look for the wrinkles above their noses: the researchers use them to identify the gorillas.

In Northern Russia you see some (4)_____ and they're looking for food. Luckily, you don't have to eat the regurgitated meat offered to the young animals! After this, you travel to India to look for tigers.

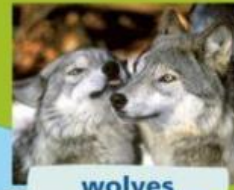

Your final destination's the coast of Australia. You have to be really brave now - you're in a cage under the water and the dangerous (5)_____ are swimming around you. Don't panic! You're safe, but just look at those powerful jaws!
