READING

Read the article. Then answer.

Most people have dreamt of winning the lottery. They think being very rich will make them happy. However, in reality this is often not the case and many lottery winners spend all their money and end up with nothing.

Some lucky winners have done better and managed to change their lives for the better. One such example is car mechanic Greg Davies from Edinburgh, Scotland. In 2014, at the age of 39, he won nearly £100 million on the lottery. At the time he owned a repair garage, but dreamt of becoming a professional racing driver.

Winning the lottery didn't change his life overnight. In fact, to begin with he didn't even celebrate, as his partner thought he was joking about his win and wanted to check his numbers.

Greg didn't spend all the money. He bought his mother a house and his son a motorbike. He also bought himself a sports car and a speedboat. Now both Greg and his partner Linda are deciding what to do with the rest of their lives.

They aren't thinking of getting married but they have decided to give up their jobs. Greg plans to become a professional racing driver and Linda wants to buy a horse or two. One thing is for certain, there will be another big change in their lives. They have decided to move house so they can have a larger garage for the cars Greg wants to buy.

Winning such a large amount of money has, they said, been an interesting experience. They have found, though, that not everyone believes they are rich. Even they don't believe that they are wealthier than many famous celebrities!
