

Health in Mexico

Health in Mexico is an important topic. Many people do regular check-ups, but some people **do not** visit the doctor often.

In rural areas, the government does provide basic services, but sometimes it **does not** cover all needs.

Ten years ago, Mexico did many reforms to improve hospitals.

However, in some regions, the reforms **did not** reach all communities.

Today, doctors **can** treat many diseases, but not everyone **can** pay for private hospitals.

People **should** eat more vegetables and exercise, but many Mexicans **should not** ignore the risks of fast food.

In the future, Mexico **will** continue to invest in health programs. Still, it **will not** be easy to solve every problem.

Do all Mexicans have access to good health? Not always.

Does the government try to improve the system? Yes, it does.

Did the reforms help many families? Yes, they did.

Can health improve with education? Of course, it can.

Should people take care of themselves? Yes, they should.

Will the future bring better health for Mexico? Many people hope it will.
