

10. Bull sharks can live in (Giza 2023)
- fresh water only.
 - salt water only.
 - seas, rivers and mud.
 - rivers, seas and oceans.
11. One of structural adaptations of bull sharks is that they
- can live in both salt water and fresh water.
 - can eat different types of food.
 - hunt in the day as well as the night.
 - can live in salt water only.
12. During hunting, when a panther chameleon stands within leaves of trees, the color of its scales changes into color.
- white
 - green
 - blue
 - black
13. Special eyes of the panther chameleon belong to adaptation.
- only structural
 - only behavioral
 - both structural and behavioral
 - neither structural nor behavioral
14. is considered as a behavioral adaptation in the panther chameleon. (Giza 2023)
- Puffing up its body during danger
 - Each eye can move independently
 - V-shaped feet
 - Tail like a hand
15. All the following are structural adaptations in the panther chameleon, except
- each eye can move independently.
 - opening its mouth wide during danger.
 - its V-shaped feet.
 - its tail like a hand.

2 Choose from columns (B) and (C) what suits them in column (A) :

(A) Animal	(B) Adaptation	(C) Helps it to ...
1. Chameleon	a. short ears and legs	A. stay cool.
2. Fennec fox	b. V-shaped feet	B. stay warm.
3. Arctic fox	c. countershading	C. balance and move.
4. Bull shark	d. panting	D. hide from its prey.
