Problem Solving

Directions: Read each problem carefully and solve for the difference.

Janice works as a receptionist at a dental office.

1. 45 patients made appointments on Monday but only 28 patients showed up. How many patients missed their appointments?

2. On Tuesday, Janice called back the patients that missed their appointments on Monday, but she only reached 13 of the patients. How many patients did she not reach?

3. 60 appointments were made on Wednesday. By lunch time, 38 patients visited the office. How many patients came after the lunch time?
