Reflection

What did you learn from making the procedure text project?

I learned that procedure text gives clear step-by-step instructions.

Why do we need to write the materials first?

Because they help us prepare before doing the steps.

How was working in groups?

It was fun, we could share ideas and making the video made it more real.

Why is procedure text important in daily life?

Evaluasi

After you have finished studying the material, please continue by working on the evaluation section. Answer each question based on your own knowledge and understanding. Read the instructions carefully, think critically before writing your answers, and make sure your responses are clear and complete. When you are ready, click Start to begin the evaluation.

- 1 Explain in your own words what a procedure text is and give one example from daily life.

- 2 Why is it important to write the materials or tools before giving the steps in a procedure text? Give your analysis.

- 3 Imagine a procedure text without connectors (first, then, after that, finally). How would it affect the reader's understanding? Explain.

- 4 In your opinion, what is the difference between using action verbs (cut, mix, boil) and using imperative sentences (Cut the bread! Mix the rice!) in a procedure text? Analyze the function of each.

- 5 Suppose your group is asked to create a procedure text about "How to make a cup of tea." What possible problems might happen if the instructions are not written clearly? Give your reasoning.
