

THE SOLAR SYSTEM

1. Match the name of each planet with its picture by dragging the correct name to the corresponding planet.

Venus

Earth

Jupiter

Saturn

Mars

Neptune

Uranus

Mercury

Sun

2. Read the statements about the planets. Choose the one that is correct

3. Match each planet with its characteristic or fact

The "Red Planet" known for its dusty surface and ice caps.

The only planet known to support life, with an atmosphere that protects it from the Sun's.

The hottest planet. Covered in thick clouds that trap heat

A tilted planet with a unique orbit and many icy moons.

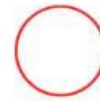

4. Choose true and false

True

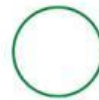

False

The moon orbits
around the earth

The sun is a star

venus is the second
planet from the sun

Neptune has no moons

5. Find the name of the planet that is known for the Great Red Spot

Y	Q	H	Y	B	V	S	E	P	N
E	R	M	Q	E	G	N	T	L	U
B	Z	U	A	C	U	A	R	A	S
H	Q	R	C	T	P	H	E	N	K
Q	T	U	P	R	N	W	T	E	X
H	V	E	R	G	E	E	I	T	Q
P	N	F	S	A	L	M	P	O	D
S	A	T	U	R	N	W	U	A	R
S	U	N	E	V	A	U	J	Q	K
R	A	V	I	Q	F	M	S	Z	S

6. Listen to the audio about two planets having a conversation. Select the two planets that are talking

← Neptune

← Mercury

← Venus

← Earth

← Jupiter

← Saturn

← Uranus
