The Gadget I Can't Live Without!

Lisa, 15

'My headphones!'

I'm really into pop music and I listen to it all the time, so I love my headphones! I always have them with me when I go to school. Last month, I left them at home one day and it felt like the walk lasted forever! Right now, I'm saving up money to get some new wireless ones. When I was younger, I only used to listen to music on my laptop, but now I use my smartphone and headphones instead. Recently, my best friend and I started learning new dance moves, so I always find cool songs that we can dance to. We want to spend all our free time practising our new moves!

Ian, 16

'My helmet camera!'

Recently, I realised that I'm on my smartphone a lot and I don't have a hobby, so I bought a helmet camera and took up skateboarding again. You see, I used to skate all the time when I was younger! Now I spend my free time at the skatepark and make vlogs of my friends and me skating. It's so much fun! When I go home, I post the videos online. And guess what! A guy saw one of them and invited me to take part in a skateboarding competition next month! I'm a little anxious, but I'm excited too!
