🌞Seasons⛄

Each season has something special, in **summer**, the days are hotter than in any other season, and people love going to the beach. Many families travel during this time to enjoy their vacations near the ocean. However, some prefer **spring** because it's fresher than summer and full of flowers.

In **fall**, the weather becomes the driest of all, and the wind blows softly through the colorful trees. People often go for walks to see the beautiful leaves on the ground. **Winter** is usually colder than all the other seasons, but it can also be cozy if you drink hot chocolate inside. For many people, summer is the sunniest season of all, while winter is the coldest season of the year. Still, every season has its beauty and activities that make it special.
