For each question, choose the correct answer.

MY ORGANIC GARDEN - *by Larry Davidson, age 13*

Last year my family and I started to make our own fruit and vegetable garden. We wanted to do something for our planet so we decided to grow our own plants organically. This means that we only use natural ways to look after them. For example, we put our old fruit and vegetables on the ground where the plants grow, but other people just throw all their old food in the bin. Also, now we grow our own fruit and vegetables, so we don't need to buy them.

Having an organic garden is clearly a healthier option because the fruit and vegetables you grow will be safe for people and animals, too. We had to work very hard. At first, we were afraid because we might not have enough time to do everything, but then we realised that each of us could look after the garden on different days.

To make our garden we used a large wooden box which was about the size of our kitchen table. We cleaned it and made 20 holes at the bottom for the water to drain out. We covered the holes with some little stones and the soil where the plants could grow.

Then we planted very tiny plants and watered them every day. On the left we planted tomatoes, onions, carrots and potatoes, while on the right there were a few melons and strawberries. In about a month we picked our first fruits and vegetables. We were so excited when we had them for dinner!

14. Why did Larry and his family build an organic garden?

A. To help the natural world

B. To stop making so much rubbish

15. How did Larry feel in the beginning?

A. Worried because it could be too much work

B. Lucky because he could eat a lot of healthy food

16. Who looked after the garden?

A. Only Larry

B. Both Larry and his family

17. How big was the box Larry used for the garden?

A. Smaller than a table

B. As large as a table

18. What does Larry say about the fruits and vegetables he planted?

A. The vegetables and fruit were in different parts

B. The plants were very small, but delicious

7. Who thinks that we might learn important things from the past?	A	B	C
8. Who believes Greek and Latin can help you in today's world?	A	B	C
9. Who thinks having many subjects to learn is a good thing?	A	B	C
10. Who says you need to study English to be ready for life?	A	B	C
11. Who thinks Greek and Latin shouldn't be school subjects?	A	B	C
12. Who says that Information Technology isn't as useful as a language?	A	B	C
13. Who thinks Science and IT are as important as other subjects?	A	B	C

THE MOST IMPORTANT SCHOOL SUBJECTS

Oskar

I think that we study more subjects now than in the past. I quite like having a lot of subjects at school, though, and I enjoy learning most of them. In my opinion the most useful ones are those which help you to find a job. Of course, subjects like Information Technology and Science are as important as other subjects, but you also need to know English well to be ready for life.

Mary

I love subjects that teach me about the world around me, like Science and Geography. I also think that we should learn about the past. History can help us to understand the world today and perhaps to find answers to modern problems. However, there are some subjects I don't think we should learn at school. Greek and Latin can be interesting, but I think that you should study them at university because they are difficult and many students my age find them boring.

Freeda

Most people don't like classical languages and think Greek and Latin are not as important as Information Technology or Maths. I think they can do a lot to help you in today's world, though. You need to use your brain to learn them and in today's world that's important if you want to find a good job. Of course, subjects like IT or Science are useful, too, but I don't think they are as important as languages.

PART 3: Question 14-18

For each question, choose the correct answer.

TRENTON BIOLOGY FAIR - *by Anita Jones, age 12*

Last month, all the science teachers at my junior high school decided to set up a biology fair. They asked all the students to plan and make a project for the two-day fair last week. I was in a group with my best friends Wei-ling, Julia and Pedro. All the groups worked hard on their projects for two weeks before the fair.

My group did an experiment to find out what happens to your teeth when you drink sugary drinks: we used three eggs because their shells are similar to the outside of our teeth. We put them into different glasses with cola, apple juice and plain water. Then we checked how the colour changed and took pictures that we pasted on a large whiteboard in the hall.

The other groups from my class worked on a lot of interesting projects, too. It was great to walk around the hall and look at the other students while they worked: one group showed how important light is to grow plants. Another group stopped an apple from turning brown by using lemon juice.

We all worked really hard and at the end of the two weeks our teachers chose the top four projects. They gave a prize to each of them. The top prize went to a group of older students. It's a pity that my group didn't get a prize but that's not so important. I was just pleased we took part and we had a great time together.

14. How long did the students prepare for the fair?

A. 2 weeks

B. 1 month

15. What was the main topic of Anita's experiment?

A. eggs

B. teeth

16. Where did the students work on their projects?

A. in the hall

B. in a garden

17. What did the group who worked on the apple find out?

A. Brown apples turn white with lemon juice.

B. Apples don't change their colour if you use lemon juice.

18. How did Anita feel when the teachers chose the best projects?

A. angry because her group didn't win

B. happy because she enjoyed working with her classmates
