

Actividad 1: lee el siguiente texto con atención. Luego, responde las preguntas basándose en la información.

Reading: Life in the Future City

In the future, people **will usually live** in smart cities full of technology. Houses **will always use** renewable energy, and robots **will often help** people with housework. Cars **won't use** gasoline anymore; they **will always run** on electricity or solar power.

Students **are going to study** online most of the time, and they **will sometimes visit** schools for group projects or special events. Doctors **will rarely work** in hospitals because medical robots **will usually take care** of basic treatments.

People **will never worry** about pollution because cities **will be cleaner** and greener. Everyone **will often travel** around the world easily, thanks to faster and safer transportation. The future **will definitely be** an exciting place to live!

1. Where will people usually live in the future?

- a) People will usually live in small villages where technology will not be common.
- b) People will usually live in traditional houses made of wood and stone.
- c) People will usually live in smart cities full of technology and innovation.
