2. _____ sick this morning.
3. _____ a high fever.
4. _____ is wrong with your shoulder?
5. What seems to be the _____ with your knee?

Reading Comprehension

I had to go to the hospital today. I fell off while riding my bike. I hurt my ankle. I had to have an x-ray to see if I broke a bone. Luckily, nothing was broken. The pain started getting worse, so the doctor did a quick checkup. He told me that I twisted my ankle when I fell. But it should be okay within a few days. He wrapped a big bandage around my ankle. He gave me some medicine to make the pain go away. He said, besides my ankle, I was a healthy girl. He also gave me some advice. He told me to make an appointment if the pain doesn't go away. I am glad I went to the hospital today.

4) Circle true or false.

1. Lisa fell off her bike. _____
2. Lisa broke a bone in her leg. _____
