I was six when I first (A1) ... what a great thing a rollercoaster (*круговые американские горки*) was. By the time I was a teenager, riding the rollercoasters (A2) ... my main aim in life. In my mid-twenties I went round the world looking for great rides. I am now the Chairman of Britain's Rollercoaster Club. I (A3) ... ninety percent of rollercoasters in the world. When I'm not on a rollercoaster, I (A4) ... American movies about them. I (A5) ... about 1,000 rides in an average year. My passion (A6) ... by many people. I set up the Club ten years ago and I have 1,500 members from seventeen countries. About once a month we meet at some theme park in the UK to ride the rollercoaster. Last month we met at Beechdale, which has the best wooden rollercoaster in the world. These days, most rollercoasters are made of steel, but to us, nothing beats one made of wood. What's the attraction for me? It's really the atmosphere — it's old-fashioned in many ways and takes me back to the time of my childhood. I don't think I (A7) ... out of it somehow.
