

Psychology - Psychodynamic theory of dreaming

Name: _____

Date: _____

- | | | | |
|-------------|---|---|--|
| 1. id | ● | ● | works to satisfy the id's desire in realistic ways, balances the id and superego |
| 2. ego | ● | ● | seeks immediate pleasure and satisfaction |
| 3. superego | ● | ● | acts as a 'moral compass', strives for perfection |

1. There are two types of dream content . The first one is latent content , which is the _____ , meaning of dreams . The second one is manifest content , which is the events that can be _____ from the dreams when we wake up . For example , in a dream where we have an argument with a stranger , then the arguing scene is the _____ . Meanwhile , this dream could bear a hidden meaning (_____) if we had a disagreement with our sibling earlier that day .

latent content	symbolic	recalled	manifest content	hidden
----------------	----------	----------	------------------	--------

2. The psychodynamic theory of dreams argue that dreams represent the fulfilment of _____ of the id . This is called _____ . The dreamwork is the process in which our unconscious mind changes _____ content into _____ content . This process includes three steps . Firstly , _____ - the combination of images , meanings , and emotions into a dream . For example , the anger when arguing with a sibling . Secondly - _____ , transfer of feelings from the original dream object to another (e . g . the anger toward a sibling is transferred to a stranger) . Thirdly , _____ - addition of details to make the manifest content logical .
