B READING . READ THE TEXT AND WRITE TRUE OR FALSE. (___/10)**THE HOTTEST CITY IN THE WORLD**

In July and August, the temperature in Kuwait City can be 50 C. The record for the city is over 52 C. In the summer, the temperature can be 44 C and most Kuwaitis stay indoors because it is too hot outside. They live in air-conditioned houses, work in air-conditioned offices, drive in air-conditioned cars and shop in air-conditioned shopping centres. The shopping centre is the only public space in the city that people go to walk around. Outside, it's just too hot. Generally, summer in Kuwait is hotter than in desert city Timbuktu, which is near the Sahara.

Fortunately, Kuwait City is one of the richest cities in the world as well as being the hottest, so paying for the air conditioning is not a problem for most people. They can enjoy fresh air and be more comfortable indoors.

Kuwait City started when a few fishermen set up their homes there in 1613. For the first one hundred years, it was a fishing village. However, in the 1700s it became the main business centre. People started to sell and buy different products between India,

Oman, Iraq and Arabia.

From 1946, Kuwait City became even richer, thanks to the discovery of oil in the area. By 1952, the country became the biggest oil producer in the area but now Saudi Arabia is the biggest one. Residents of the city describe it as an exciting place to live, with people of numerous cultures and from many countries now calling it their home. So despite the heat, the city is alive and well!

EXAMPLE. The hottest temperature in Kuwait city is more than 52oC. **TRUE**

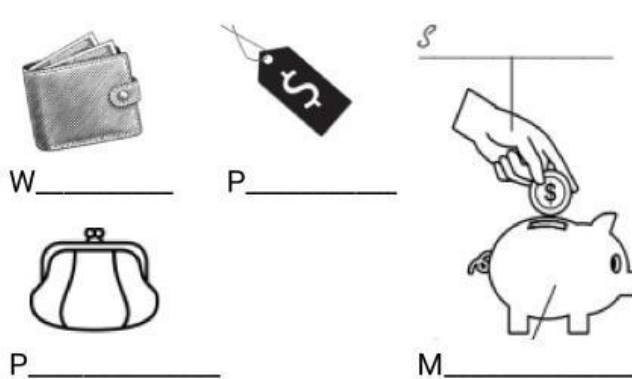

1. People stay outdoors in the summer.
2. Timbuktu is hotter than Kuwait.
3. People in Kuwait City have air-conditioning.
4. Kuwait City was a fishing village 10 years ago.
5. Kuwait is the biggest producer of oil in the area now.
