How do flowering plants reproduce?

8 LABEL the parts of this flower. WRITE calyx, corolla, pistil and stamen.

9 CIRCLE the correct words in these sentences about the parts of flowering plants.

a. The pistil is the male / female part of the flower. It contains the ovary.
b. The calyx consists of small green leaves called sepals / petals.
c. The ovary / corolla consists of coloured parts called petals.
d. The stamens are the male / female part of the flower. They produce pollen.
e. The seed contains a very small plant called an ovary / embryo.

10 USE the key to circle the types of fruits.
