The Story of the Sustainable Development Goals

Read the text and fill in the gaps with the correct term.

The 2030 Agenda for Sustainable Development was agreed upon by all _____ in 2015. It's a detailed plan to address the world's biggest problems and make a fairer and more _____ for everyone. The plan has 17 _____ that show how countries can work together to achieve peace, prosperity, and well-being for all people and the planet.

The SDGs understand that different parts of development, like ending _____, improving health and education, reducing _____, and supporting economic growth, are connected and should be dealt with together to make real _____. The goals also stress the importance of taking quick and united action to deal with climate change, protect the environment, and save _____.

By following a universal approach, the 2030 Agenda asks all countries, whether they are developed or developing, to work together as a _____ to reach these goals. The SDGs give a _____ for governments, businesses, civil society, and individuals to join forces, use resources wisely, and make policies that lead to sustainable development.

The 2030 Agenda is a major step forward in the world's promise to tackle global problems and promote fair and sustainable development. It knows that we must act now and plan for the future to make life better for current and future _____. To make sure we're on track, we'll keep an eye on progress, report regularly, and review our strategies. This will help us see what's working, where we need to do more, and make sure everyone is _____ about how we're doing with the SDGs.
