

The maps show a road system as it is now and the proposed changes in future to reduce the number of accidents. Summarize the information by selecting and reporting the main features and make comparisons where relevant.

The maps provide a number of suggested changes to the existing road system to enhance the safety of roads.

Overall, the primary proposed changes are the **construction** of a major roundabout, the **installation** of sets of traffic lights, and the **restructuring** of current roads.

At the west of the town, two major changes are proposed on Low Lane where there are two **accident-prone areas** (*khu vực hay xảy ra tai nạn*). **While** a set of traffic lights is proposed at the (1) _____ (*ngã tư*) of City Road and Low Lane to minimize accidents which occur in high frequency here, the south of Low Lane where it (2) _____ (*tiếp giáp với*) Forest Lane will be straightened for the same purpose.

The (3) _____ (*ngã tư*) of City Road and Forest Road is also another area with frequent accidents and is the site of a proposed (4) _____ (*bùng binh*). Other efforts to **minimize/ tackle** traffic problems in the town (5) _____ (*involves/ involving*) the erection of a new road (6) _____ (*branch off*) from the roundabout to the supermarket and the (7) _____ (*nhá bỏ/ dỡ bỏ*) of the old one (8) _____ (*intersect*) the supermarket and City Road.
