- A. It becomes more expensive over time.
- B. It loses its value and becomes basic.
- C. It becomes exclusive to certain providers.
- D. It becomes more specialized and advanced.

8. What analogy does the speaker use to explain the future of cloud providers?

- A. Charging a smartphone with different turbines.
- B. Plugging in a phone to a specific network provider.
- C. Using different SIM cards for different networks.
- D. Selling refrigerators with various features.

9. What will be the core capabilities of cloud providers in the future?

- A. Offering a wide range of services and capabilities.
- B. Providing specialized solutions for bespoke applications.
- C. Focusing on power grid and communication networks.
- D. Developing new layers of surfaces for networking.

10. According to the video, what will be as ubiquitous as a power outlet in your house?

- A. Cloud providers' core capabilities.
- B. The commoditization of networks.
- C. The best of breed solutions.
- D. The convenience of working with the cloud.

11. What is the speaker's white paper titled?

- A. The Future of Cloud Providers.
- B. The Next Layer of Networks.
- C. The Commoditization of Networks.
- D. Choosing the Right Cloud Solution.

12. What should viewers do if they want to figure out the right cloud solution for their organization?

- A. Read the white paper linked in the video description.
- B. Reach out to Intricity and talk to a specialist.
- C. Watch more videos about cloud providers.
- D. Consider the relevance of different cloud capabilities.

13. What is the main idea behind the concept of commoditization of networks?

- A. The monopolization of network providers.
- B. The layering of networks on top of each other.
- C. The narrowing of cloud providers' offerings.
- D. The loss of value in network services over time.
