Section One :- Reading passage :

Direction one: For items 1-10, read the following passage carefully, then choose the correct answer for each questions according to the information in the passage and write your answer on the separate answer sheet.

The walnut tree produces wood that is used for countless purposes, and is considered the finest wood in the world .The wood is easy to work with, yet it is very hard and durable, and when it is polished, it is produced a rich, dark luster ,it also shrinks and swells less than any other wood which makes it especially desirable for the fine furniture, flooring ,and even gun stocks.

In fact. just about every part of the walnut is unusually hard and strong. The Nut of the tree is coated inside a very hard shell, which itself is in closed in leathery outer covering meat inside.

Yet every part of the walnut is useful to people. The outer husk produces a dark reddish stain that is hard to remove from the hands of the person, who opens the nut ,and this color is widely used in dyes and wood stains .The inner shell is used as an abrasive to clean jet engines. And the meat of the nut is extensively used to cooking , ice cream, flavoring, and just eaten raw.

Walnut trees exude a chemical into the soil near their roots which can be poisonous to some trees and shrubs. Fruit trees ,for example, will not survive if planted too close to a walnut. Many other plants ,such as maple trees or ivy ,are not affected by the walnut's presence, and are well-suited to grow in its vicinity.
