

Reading: The Water Cycle

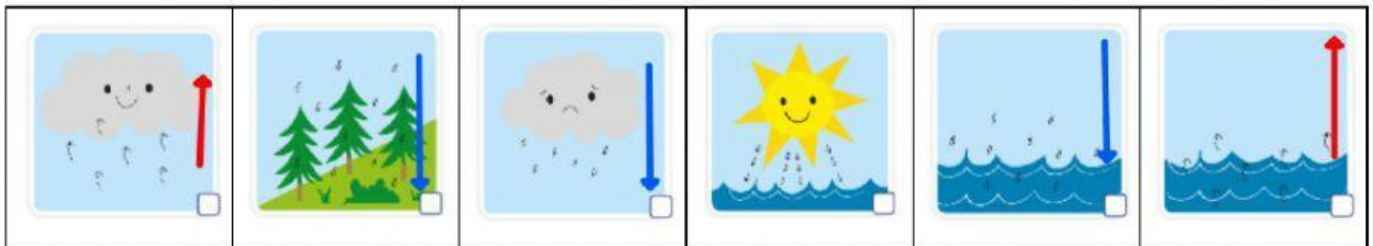

A. Select the correct words in the labels.

B. What happens first? Write the numbers.

- The rain falls into the ocean, and the cycle starts again.
- The vapor changes and becomes a cloud.
- 1** The sun makes the water in the ocean hot.
- The rain falls onto the earth, trees, and grass.
- The water in the ocean goes up into the air and becomes vapor.
- Water vapor makes the cloud heavy, and it starts to rain.

Drag and drop the pictures in order.
