

DIFFERENT TYPES OF HOUSES

A Journey Through Homes Around the World

WHAT WE'LL LEARN TODAY

- 1 What is a House?
- 2 Palace - A Royal Home
- 3 Hut - A Simple Shelter
- 4 Villa - A Luxury House
- 5 Eco House - Earth-Friendly Living
- 6 Flat/Apartment - City Living

EXPLORING HOMES

Let's discover the amazing variety of houses people call home!

WHAT IS A HOUSE?

A house is a **building where people live**. It keeps us safe from rain, sun, wind, and cold.

Houses come in many **shapes and sizes** around the world. Some are big, some are small.

But they all give us a place to **sleep, eat, and spend time with our families**.

Home Sweet Home

PALACE

A Royal Home

A palace is a **very large, fancy house** where kings, queens, or important people live.

Palaces have **many rooms, beautiful gardens, and special decorations**. Some are so big that hundreds of people can live and work there!

Example: **Buckingham Palace** in London, where the King of England lives.

HUT

A Simple Shelter

A hut is a **small, simple house** made from natural materials like wood, mud, or dried plants.

People have lived in huts for **thousands of years**. They are easy to build and keep people warm and dry.

Many people around the world **still live in huts today**, especially in villages and rural areas.

VILLA

A Luxury House

A villa is a **big, beautiful house** that usually has a garden, swimming pool, or courtyard.

Villas are often found in **warm places near the beach or in the countryside**. They have lots of space and are designed for comfort.

Some villas are **vacation homes** where families go to have fun and relax together.

ECO HOUSE

Earth-Friendly Living

An eco house is a **special home designed to help the environment**. It uses clean energy from the sun or wind.

Eco houses have **solar panels, rainwater collectors, and gardens on the roof**. They help keep our planet healthy!

They **save water and energy**, making them good for nature and our future.

FLAT/APARTMENT

City Living

A flat (also called an apartment) is a **home inside a tall building**. Many families live in the same building.

Flats are common in **cities where there isn't much space**. They can be on different floors.

People use **elevators or stairs** to reach their homes in tall apartment buildings.

LET'S TALK ABOUT OUR HOMES!

Activity Time! Turn to a partner and answer these questions:

1. What type of house do you live in?
2. What is your favorite room in your house?
3. If you could design your dream house, what would it look like?
4. What makes your house special to you?

Share your answers with the class!

EVERY HOME IS SPECIAL!

Whether it's a small hut or a big palace, what matters most is the love and happiness inside. Thank you for learning about different types of houses with me!
