

Match with the correct category by placing it in the right column.

A.

Deforestation increases CO₂ emissions because ...	fewer trees mean less CO ₂ is removed from the atmosphere.
	when forests are cleared, the carbon stored in trees is released back into the atmosphere as CO ₂ .
We should plant more trees because ...	trees take in CO ₂ , helping lower greenhouse gases.
	trees cool the Earth by blocking sunlight and providing shade.
	Mature trees protect communities against flash floods and landslides by stabilizing soil and absorbing water

B.

Gasoline vehicles increase CO₂ emissions because ...	burning gasoline produces a large amount of CO ₂ .
	exhaust gases release CO ₂ and other greenhouse gases.
We should use public transport because ...	there will be fewer individual gas-powered vehicles on the road, which lowers total CO ₂ output.
	public transport maximizes energy efficiency by moving large groups of people at once.
	low-carbon transport supports a greener lifestyle.
