

Surface Area = find the area of each side, then add them up altogether

1) Calculate the area of each side.

- Bottom Side = cm^2
- Left Side = cm^2
- Right Side = cm^2
- Front Side = cm^2
- Back Side = cm^2

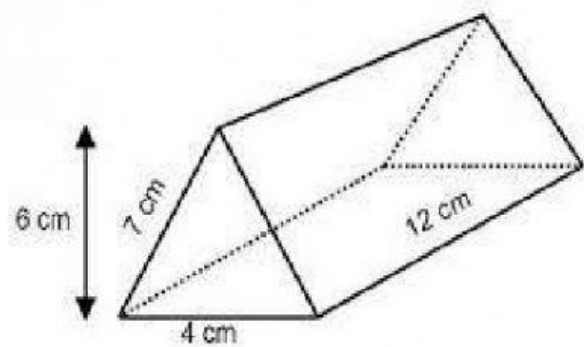

2) Add all the sides up for the shape's total surface area = cm^2

3) This shape is called a: Prism

1) Calculate the area of each side.

- Bottom Side = cm^2
- Left Side = cm^2
- Right Side = cm^2
- Front Side = cm^2
- Back Side = cm^2

2) Add all the sides up for the shape's total surface area = cm^2

3) This shape is called a: Prism

1) Calculate the area of each side.

NB: Remember there are 2 parts labelled A and 5 parts labelled B

- A = cm^2
- B = cm^2

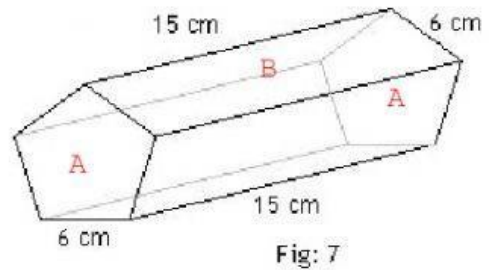

Fig: 7

2) Add all the sides up for the shape's total surface area = cm^2

3) This shape is called a: Prism
