III. Read the passage and circle A, B, or C to answer each question from 25 to 29

In the last few decades, the rise of digital technology has transformed various aspects of human life, particularly in the field of education. The internet, smartphones, and interactive

platforms have opened up new possibilities for both teachers and students. While these innovations have brought about significant improvements in the quality of education, they have also posed new challenges. One of the major advantages of digital learning is its flexibility. With online courses, students can study at their own pace, from the comfort of their homes, without being bound by traditional classroom schedules. This has proven especially beneficial for adult learners and working professionals who wish to upgrade their skills without interrupting their careers. Furthermore, the internet provides access to a vast array of resources, from academic journals to educational videos, which can enhance learning experiences. However, there are also concerns associated with digital education. The over-reliance on technology can lead to a lack of face-to-face interaction, which is crucial for developing social and communication skills. Additionally, not all students have equal access to the internet or digital devices, creating a digital divide. This inequality may prevent some students from taking full advantage of online learning opportunities. In conclusion, while digital education has revolutionized learning, it is important to balance its advantages with its challenges to ensure that all students can benefit equally.

Question 25: Which of the following is the best title for the passage?

- A. The Future of Education
- B. The Benefits and Drawbacks of Digital Learning
- C. The Rise of Digital Technology in Classrooms

Question 26: According to the passage, what is a key benefit of digital learning?

- A. It improves social skills.
- B. It offers flexibility and convenience.
- C. It reduces the cost of education.

Question 27: The word “over-reliance” in the passage is closest in meaning to _____.

- A. complete dependence
- B. occasional use
- C. manageable control

Question 28: What concern about digital education is mentioned in the passage?

- A. It is too expensive for many students.
- B. It leads to less effective learning outcomes.
- C. It creates a gap in access to learning opportunities.

Question 29: According to the passage, which of the following is TRUE?

- A. All students have access to digital learning resources.
- B. Digital education is entirely free of challenges.
- C. Digital education can help students learn in a flexible manner.

IV. Read the following passage and associate each paragraph with the correct heading.

THE IMPACT OF TECHNOLOGY ON TEENAGERS

30. In today's digital age, technology plays an integral role in the lives of teenagers. Many teens spend a significant amount of time on smartphones, tablets, and computers, which can have both positive and negative effects. While technology can provide educational resources and connect teens with peers, excessive use can lead to issues such as poor time management and addiction. _____

31. Social media platforms have become a primary way for teens to communicate and share their lives. Through apps like Instagram and Snapchat, they can showcase their interests and connect with friends. However, the pressure to maintain an online presence can lead to anxiety and comparison with others. _____

32. Online gaming is another popular activity among teenagers, offering a sense of community and competition. While gaming can improve cognitive skills and teamwork, it can also lead to unhealthy habits, such as reduced physical activity and social isolation. _____

33. Cyberbullying is a growing concern in the digital landscape. Many teenagers experience bullying through social media and messaging apps, which can have severe emotional impacts. It is essential for teens to learn how to navigate these challenges and seek help when needed. _____

34. Despite the potential drawbacks, technology can also enhance learning experiences. Educational apps and online courses allow teens to explore subjects at their own pace and access information that may not be available in traditional classrooms. This flexibility can lead to greater engagement and a love for learning. _____

List of Headings:

- A. The Benefits of Technology in Education
- B. Social Media and its Emotional Effects
- C. The Dangers of Cyberbullying
- D. Online Gaming: Pros and Cons
