

Mendel's Rule of segregation: 2. Dihybrid Cross

Activity 1-3. Cross Parent 1, tall with purple flowers (GGNN), with Parent 2, short with white flowers (ggnn) to determine the F₁ generation offspring. Then, cross two of the F₁ generation offspring to determine what the F₂ generation offspring will look like. Also select the correct genotypes and phenotypes.

1.1 Parent 1 (P): genotype

1.2 Parent 2 (P): genotype

3. Offspring (F₁):

Cross Parent 1 with Parent 2

2.1 Trait 1 Gametes

2.2 Trait 1 Gametes

Parent 1 Gametes

P gametes genotype

P gametes phenotype

P gametes genotype

P gametes phenotype

F₁ offspring genotype

F₁ offspring phenotype

4. Offspring (F₁): genotype

5. Trait 1 Gametes

F₁ gametes: dominant alleles

F₁ gametes: recessive alleles

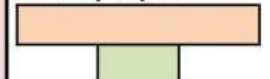

6. Offspring (F₂): Cross F₁ Parent 1 with Parent 2

Parent 1 Gametes

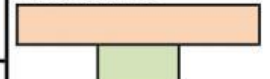

Parent 2 Gametes

F₂ genotypes and phenotype ratio

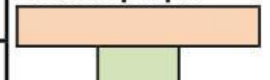

1. tall purple

2. tall white

3. short purple

4. short white
