In the near future, experts believe our homes will work more intelligently thanks to AI and a huge network of connected devices known as the *(0)* ***IoT***. Many people already use a (1) _____ to control lights or answer questions, but new systems will go further. Household machines will communicate (2) _____ and share data through built-in (3) _____, helping us manage energy use more efficiently. Some devices will even adjust (4) _____ or room temperature after they analyse what they detect.

Outside the home, (5) _____ and drone technology are developing quickly, offering safer ways to inspect buildings or deliver supplies. At school, teachers hope to develop (6) _____ that encourages students to interact online and offline without increasing their screen time. But as more information is constantly (7) _____ or downloaded and shared on digital media and social media, concerns about (8) _____ and people getting distracted are growing. Even so, scientists insist that these (9) _____ innovations will continue to improve our lives, especially as researchers work to (10) _____ new technology and publish their findings online.

LIVEWORKSHEETS

III. Complete the sentences with ONE WORD ONLY from the text.

Smart Technology and Everyday Life

In recent years, homes and workplaces have changed rapidly thanks to advances in technology. Many houses now use AI to run basic tasks, and some people rely on a digital device that can speak, set reminders, or answer questions. Across cities, thousands of machines are linked through the Internet to monitor traffic flow, reduce pollution, and improve public services. These systems can also upload information instantly, allowing experts to review patterns and make predictions.

Engineers continue to develop tools that help people work more efficiently. New machines can communicate with each other without human control, and companies are investing heavily in cutting-edge designs. Meanwhile, young people spend increasing amounts of time using digital platforms. For many, chatting on social networks or watching online videos has become a habit, and too much screen time may lead to unhealthy behaviour. Some students find it difficult to focus because they easily get distracted by their devices.

Scientists are also improving smart machines such as robots, drones, and devices that respond to information from a sensor. These machines can collect data, detect movement, or even turn on artificial lighting when needed. In schools, developers aim to create tools that improve learning and allow teachers to publish materials on the internet or send feedback instantly.

0. *Some houses use **AI** to run basic tasks without human effort.*
1. Many people depend on a digital _____ that can speak or set reminders.
2. Cities use connected machines to upload _____ instantly for experts to analyse.
3. Companies are investing in _____ designs to improve technological efficiency.
4. Having too much _____ time may lead to unhealthy behaviour in young people.
5. Some machines can turn on artificial _____ automatically when needed.

IV. Answer each question using an appropriate future form and your own ideas.

0. Your friend asks: "Can we meet at 5 p.m.?"

→ ***I'm meeting my manager at 5 p.m., so I won't be able to***.

1. Someone says: "Look at those waves. They're getting bigger."

→ _____.

2. Your colleague asks: "Do you know what time the exhibition opens on Friday?"

→ _____.

3. Your classmate asks: "Why can't you join the study group this evening?"

→ _____.

4. Your friend asks: "Can you send me the report later today?"

→ _____.

5. Someone asks: "What will you be doing at this time next Monday?"

→ _____.

19 You will hear three different extracts. For questions **1 – 6**, choose the answer (**A**, **B** or **C**) which fits best according to what you hear. There are two questions for each extract.

Extract One

You hear two scientists, Peter Cameron and Lisa Mackie, discussing generating electricity from the energy in the oceans.

1 What does Peter believe is the greatest advantage of generating electricity from the oceans?

A The seas provide a reliable energy source.

B It will be cost-effective in the long run.

C Many countries will be able to create their own energy.

2 What is Lisa doing?

A correcting the information that Peter gives

B suggesting an alternative opinion

C predicting future developments

Extract Two

You hear two friends discussing the practice of urban foraging, which is picking nuts and fruit from around a city.

3 Why does the woman think urban foraging is popular?

A People seek a strong connection with nature.

B Wild food is guaranteed to be organic.

C It can save money on grocery bills.

4 How do they both feel about urban foraging becoming possible in their local park?

A worried that many plants will be destroyed

B hopeful that plant identification courses will be held

C surprised that local residents weren't consulted about it

LIVEWORKSHEETS

Extract Three

You hear a husband and wife talking about planning a holiday.

5 The woman mentions last year's holiday in an attempt to

A justify increasing their holiday budget this year.

B avoid a similar situation occurring this year.

C influence their choice of holiday this year.

6 What approach to packing for their holiday do they agree on?

A It's essential to make a detailed list.

B It's a good idea to do it well in advance.

C It's better to pack too many items than too few.
