#### **THE WORLD OF COLOURS**

Artists use colour to **create** patterns. Colour can also show different moods. Bright colours make us feel happy and energetic. Dark colours make us feel calm or sad. The primary colours are red, yellow, and blue. They are the colours that can be mixed together to make different colours. Mixing two primary colours makes a secondary colour. The secondary colours are orange, green, and violet. Orange is made by mixing yellow and red. Green is made by mixing yellow and blue. Violet is made by mixing red and blue. Intermediate colours can be made by mixing two primary colours and a secondary colour together. Some intermediate colours are blue violet and red orange. Black, white, and gray are special colours. They are called neutral colours.

Colours have been organised into a colour wheel. It shows the three primary colours, the three secondary colours, and the six intermediate colours. Artists use the colour wheel to help them know which colours they want to use together.
