

Drag and drop the parts of a typhoon and their description to the right place.

Eye

This part is around the eye. It has the strongest winds and rains. The winds may blow 200 miles per hour.

Eyewall

The center part of the storm which is the calm part.

Inner Rainbands

Extend outward from the center of the storm and can span hundreds of miles, influencing regions well beyond the immediate vicinity of the storm.

Outer Rainbands

Situated closer to the storm's center, are characterized by intense convective activity, producing heavy rainfall and strong winds.

Typhoon Category and Impact Matching Quiz

Instructions: Match the tropical cyclone category (Column A) with its maximum sustained wind speed range (Column B) and potential impacts (Column C). Use the letters and Roman numerals for your answers.

Column A (Category)	Column B (Wind Speed)	Column C (Potential Impact)
_____ 1. Tropical Depression (TD)	_____ 1. 118 to 184 kph	I. Minimal to Minor threat to life and property
_____ 2. Tropical Storm (TS)	_____ 2. 62 to 88 kph	II. Minor to moderate threat to life and property
_____ 3. Severe Tropical Storm (STS)	_____ 3. 39 to 61 kph	III. Moderate to significant threat to life and property
_____ 4. Typhoon (TY)	_____ 4. Exceeding 185 kph	IV. Significant to severe threat to life and property
_____ 5. Super Typhoon (STY)	_____ 5. 89 to 117 kph	V. Extreme threat to life and property
