. As you know...
. However,
. When it comes to... (-ing)
. When we talk about (-ing)

. In my personal opinion

. To conclude

Here, you have some examples.

TECHNOLOGY

EX 1)

Today, I want to talk about technology and why it plays such an important role in our lives.

As you know, technology surrounds us everywhere we go. From smartphones to computers, it's hard to imagine a day without these devices. They have become essential tools for communication, learning, and entertainment.

LIVEWORKSHEETS

However, technology is not just about convenience; it has revolutionized the way we work and connect with others. When it comes to communicating with friends and family, platforms like social media and messaging apps make it easier than ever to stay in touch, no matter where we are.

When it comes to learn**ing**, technology provides us with access to a wealth of information at our fingertips. The internet allows us to research any topic and learn new skills through online courses and tutorials.

In my personal opinion, technology has also opened up new opportunities for businesses and entrepreneurs. It enables small companies to reach global markets and compete with larger corporations on a more level playing field.

To conclude, while there are challenges associated with technology, such as privacy concerns and digital divides, its benefits outweigh the drawbacks. It enhances our lives in countless ways, making tasks easier, connecting us with others, and expanding our knowledge. As we continue to advance, embracing technology responsibly can lead to a brighter and more connected future for all of us.

EX 2) Today, I want to discuss the impact of technology and some concerns that come with its widespread use.

As you know, technology has become an integral part of our daily lives. It has transformed how we work, communicate, and entertain ourselves.

However, when it comes to relying too much on technology, there are several drawbacks we need to consider.

When we talk about enhanc**ing** technology can sometimes lead to a decrease in face-to-face communication. Many people prefer texting or messaging over talking in person, which can affect the quality of our relationships and social skills.

When it comes to safeguard**ing** privacy, technology has raised significant concerns. Our personal data is often collected and stored by companies, sometimes without our knowledge or consent. This can lead to breaches of privacy and potential misuse of sensitive information.

In my personal opinion, while technology offers many benefits, such as instant access to information and efficient communication, we must approach its use with caution. It's essential to strike a balance between technology and real-life interactions, protect our privacy rights, and be mindful of its impact on our well-being.

To conclude, while technology has undoubtedly improved many aspects of our lives, we must also acknowledge its challenges. By being aware of these issues and making informed choices, we can harness the positive aspects of technology while mitigating its negative effects.
