Hey Wendy,  
How are your exams going? I was feeling really stressed last week because I couldn't seem to distract / concentrate / reduce on my revision, but I've (1) calmed down / sped up / turned off a little now and I feel more relaxed.  
It's all thanks to a music company called focus@will. It's got a music streaming site like Spotify or Pandora, but the music is different. It's not the kind of music that you want to turn (2) up / down / off and (3) affect / speed up / sing along to. It's music that (4) cheers up / increases / slows down your ability to focus.  
It's hard to explain, but the music (5) increases / affects / reduces your brain and stops things from (6) distracting / concentrating / improving you. I've been using it for about three days now and my ability to study has really (7) reduced / improved / turned down.  
You should go online and listen to it so you'll understand what I'm talking about.  
See you at the weekend,  
Stephen
