Vocabulary

2 Fill in:

replace adopt translate charge colonise

- 1 I need to my smartphone; it's nearly out of battery.
- 2 He will soon the local dialect.
- 3 The shop will its staff with robots.
- 4 The tour guide will the text for us.
- 5 Scientists are planning to the Moon.

Vocabulary

3 Choose the correct item.

- 1 The Moon is **on** **in** orbit around the Earth.
- 2 Is there life **at** **on** other planets?
- 3 He accidentally gave **up** **away** her secret.
- 4 When was the first satellite launched **into** **over** space?
- 5 She finally gave **back** **in** and agreed to come with us.

Grammar

4 Put the verbs in brackets into the correct future tense.

1 Anna likes learning about space so she (study) Physics next year.

2 You (break) my laptop if you aren't careful!

3 The science museum (open) at 10:00 am every day.

4 I (meet) Kate for lunch later. Would you like to come?

5 I think I (enjoy) working in the planetarium.

5 Choose the correct item.

1 This time tomorrow, I 'll be working 'll have worked in the café.

2 By 2100, we will be building will have built cities on other planets.

3 Drones will be replacing will have replaced delivery vans by 2025.

4 Don't worry. Tom will be returning will have returned home by 5:30.

5 We 'll be learning 'll have learnt about electricity at school next week.

6 Put the verbs in brackets into the correct tense.

1 If I won the lottery, I (book) a flight on a spaceship.

4 Charlie never tidies up his room.

5 I can't connect my laptop to the Internet.

Listening

8  You will hear Sally Parker talking about her job. Listen and write the correct answer in each gap (1-5).

▶ 0:00 / 0:00  

Interviewer

Sally needs to 1) the applications before she has an interview.

Before she was an interviewer, Sally had a job as a(n) 2)

Sally remembers the 3) applicants most of all.

Sally says applicants should show they are 4) in the job.

In the future, a(n) 5) might do Sally's job.

Reading

9 Read the text and decide whether the statements (1-5) are *True* or *False*.

Space Junk

Our streets are full of litter, the sea is "swimming" in trash and now we're filling up space with rubbish, too! Experts say that there are more than 7,600 tonnes of space junk in orbit around the Earth. How did it all get up there? Well, it mainly consists of old satellites that have broken up, or parts that have detached from existing satellites and space stations. These pieces of space junk may not be very big, but since they move at up to 30,000 miles an hour, they could cause a lot of damage to newer space traffic. So, how will we clean up our space mess? Luckily, scientists have the answer. In April 2018, a spacecraft called RemoveDEBRIS was launched from Florida, USA. This spacecraft uses a huge net to gather up space junk, and then sends it into the Earth's atmosphere where it safely burns up. So, the world's most advanced litter-picker is slowly tidying up space!

1 There are 7,600 tonnes of rubbish on Earth.

True

False

2 Some space junk comes from satellites which are still in use.

True

False

3 Most space junk moves at slow speeds.

True

False

4 Space junk might collide with spacecraft.

True

False

5 RemoveDEBRIS sends space junk further into space.

True

False

Everyday English

10 Match the exchanges.

I worked as a tour guide last summer. I was dealing with customers. I consider myself a patient and friendly person.

Yes, that's right. I look forward to hearing from you.

1 Do you have any experience?

2 What were your responsibilities?

3 Why should we hire you for this position?

4 You're Bob Parker, aren't you?

5 I'll let you know of our decision.
