

Name \_\_\_\_\_ Identifying Claims and Evidence

## Identifying Claims and Evidence

A **claim** is \_\_\_\_\_

A claim is ALWAYS \_\_\_\_\_

**Evidence** is \_\_\_\_\_

Evidence is NOT \_\_\_\_\_

You use evidence to \_\_\_\_\_

Consider the following statement:

***Most vitamins cannot be synthesized by the human body.***

Is the statement a claim, or is it evidence? \_\_\_\_\_

How do you know? \_\_\_\_\_

If the statement is evidence, write a claim that would go along with it. If the statement is a claim, write a piece of evidence that supports it.
