## Reading

### 3 Read and write **Ma** (Mastodon) or **Mo** (Mosasaur).

#### Mastodon

Mastodons were very big animals that looked like elephants or mammoths. Some mastodons had four tusks: two big ones and two small ones. Mastodons had fur and they were about three metres tall. They ate leaves and plants. They lived in Asia, Eastern Europe and North America during the Ice Age. Mastodons disappeared about 10,000 years ago, but we don't know why.

#### Mosasaur

Mosasaur became extinct 65 million years ago. Mosasaur weren't dinosaurs, but they were similar to snakes or lizards. Mosasaur were about 15 metres long, and they lived in water. They had long tails and they could swim well. They didn't have fur. They hunted fish and other animals. Most mosasaur fossils are in Europe and North America.
