Прочитайте текст. Из каждой строки (B9–B18) выпишите ОДНО лишнее слово.

B9. You're thirsty and you get yourself a few glass of water. Do you ever wonder how old
B10. does that water really is? The glass of water that you're about to drink may have fallen
B11. from the sky as rain only at last week. However, water itself has been around pretty much
B12. as long as the earth has! In fact, although every oceans, seas and rivers cover 70 % of
B13. the earth, there is a limited supply of water, which may keeps on moving round the earth.
B14. This is been because of what's known as the water cycle. The sun heats up water and it
B15. turns them into clouds, which are formed from water vapour. When the clouds become
B16. heavy, the water falls back onto the earth such as rain. Of course, clean water is absolutely
B17. essential for good health. The amount of safe drinking water that has gone up around
B18. the world, but approximately one billion people still lack of easy access to clean water.
