BRAM STOCKER

Bram Stoker is famous today for "Dracula" but this fame came after his death. In fact, he started writing fiction quite late in life, in 1890, when he was 43. He was 50 years old when he wrote "Dracula".

As a child, Abraham, or "Bram" Stoker, was quite ill. He couldn't stand or walk until he was seven years old, but later he became a brilliant sportsman and played football for his University, the University of Dublin. He then had a number of jobs but the most interesting one, which occupied the majority of his working life, was his work with Henry Irving. Irving was the superstar of his day, a wonderful actor. Stoker was Irving's manager and personal secretary for 27 years and he went with him on his American tours. Sometimes he had to write 50 letters a day for him.

Bram Stoker wrote several novels but "Dracula" is by far the most famous, because it is a classic Gothic horror novel. It has all the features, a medieval castle, a mysterious country, unremitting evil with the final triumph of good.

Bram Stoker died in London in 1912.

IMMUNE SYSTEM-BOOSTING FOODS FOR WINTER

By Karon Warren

Winter brings colder temperatures and shorter days, and, unfortunately, it usually means more sick days, too. To limit exposure to illness, some may get a flu shot, take a multi-vitamin or wash their hands more often. There are simple additions you can make to your diet that also could boost your immune system.

11. _____

While berries are quite popular during the summer when they are in season, they also can provide health benefits in colder weather. Doctors recommend them because they are naturally high in vitamin C. Add your favourite variety to oatmeal, yoghurt, smoothies, pancakes and muffins.

12. _____

Making yoghurt a part of your daily meals is another good way to boost your immune system. It's a good source of vitamin A, protein and zinc, not to mention healthy bacteria that potentially protect your digestive tract from disease-causing germs. Yoghurt makes a great afternoon snack, or use it as a fruit dip or in a smoothie.

13. _____

Give your immune system a boost in winter with a bit of honey. Used as an antibiotic for centuries, it helps prevent bacterial growth. Add some honey to your hot tea or spread on a piece of wheat toast. It is also a tasty addition to plain yoghurt or drizzled on oatmeal.

14. _____

Hot tea is a standard beverage for many people, especially during colder weather. Hot tea may help our bodies ward off infections. Not only that, but as an added bonus, drinking tea will help keep us hydrated.

15. _____

A very popular winter spice, cinnamon also delivers some key health benefits. Cinnamon contains essential oils that may help reduce the amount of time we spend getting over a cold or the flu. Sprinkle some cinnamon on rice pudding, add to curries or sprinkle over honey drizzled on wheat toast.

16. _____

Studies show that turmeric may help fight infections, reduce inflammation and treat digestive problems. Typically found as a bright yellow powder, this immune system booster is often used in Asian curry dishes. You also can add it to egg salad, salad dressings or steamed cauliflower.

☐ A Make Room for Mushrooms

☐ B Sip Something Warm

☐ C Add Some Sweetness

☐ D Get Spicy

☐ E Be Berry Good

☐ F Don't Forget the Dairy

☐ G Increase the Flavor

☐ H Add a Dash of Ginger

TASK 4

Read the text below. Choose from (A–H) the one which best fits each space (17–22). There are two choices you do not need to use. Write your answers on the separate answer sheet.
