

SCIENCE / FAMOUS PEOPLE Steve Jobs

1. Steve Jobs, who the gifted creator of Apple computers, grew up in California as
2. the adopted son of a very normal couple who were been unaware of the potential
3. of their genius son himself. When they asked each other "What will our son be
4. when he's older?" the answer was probably not "He'll be one of the most richest
5. men in America". But that is what he have became. Steve did well at school but
6. didn't like exam revision. He could made an application for university and was given
7. a place there, but he found it such boring and soon dropped out. With a few friends
8. he was built the first Apple computer in his father's garage and he never looked
9. back. The rest is these history: his extraordinarily creative mind brought us
10. either the iPhone and the iPad, as well as the most stylish computers around.
