19. Answer the Questions

Good morning, everyone. Here's my creation, a plastic lantern (showing the plastic lantern). This lantern is not just like a common lantern, but I made it special. It is a round colorful lantern. I made it from a plastic bottle that I cut and shaped into a round lantern

As you can see, there is a light bulb inside the lantern. I put the light bulb near the neck of the bottle so the lantern could be brighter. There is also a string to hang the lantern. The string goes through the hole that I made. I decorated it with ribbons and painted the lantern to make it more beautiful and colorful.

The topic of the talk is ….

Internet Safety Rules and What to Do Online

Internet safety is the practice of following actionable guidelines,understanding modern technology, and protecting your digital devices. There are six behavior ideas to be safe online:

1. Verify someone's identity

What to do: always check someone's identity. If someone seems very into themselves but doesn't have online friends to show for it, that person may be an imposter!

2. Verify a link is safe

What to do:

First, always understand web addresses. They should begin with HTTPS.Second, know about hovering. Hovering is when you place your mouse cursor over a link (without clicking it) to see the link embedded in the text. If the link shows a different web when hovering with your mouse cursor,never click it!

3. Identify an online scam

Online scams often take the form of unsolicited emails, instant messages, or text messages and they tell the cipient to do something, like click a link.

What to do:

Never click the link! If you do, it will cause your digital device trouble.

4. Protect your privacy

How:

- Always hide your phone numbers.
- Always keep your addresses and contact information secret, even from social networks that ask for them.

5. Create passwords

How:

- Always create strong passwords that should be:
- 10+ characters long
- Including letters, numbers, and other characters
- Unrelated to personal information
