1. .
2. The US is located in North America between Canada in the north and Mexico in the south. It lies between two oceans – the Atlantic Ocean on the east coast and the Pacific Ocean (the largest ocean in the world) on the west coast.

3. The US is divided into four main regions: the NorthEast, Midwest, South, and West.

4. The US is divided into 50 states. Thirteen U.S. states share a border with Canada: Maine, New Hampshire, Vermont, New York, Pennsylvania, Ohio, Michigan, Minnesota, North Dakota, Montana, Idaho, Washington, and Alaska.
   Four U.S. states border Mexico: California, Arizona, New Mexico, and Texas.

5. The US also has five major territories. A U.S. territory is a part of the United States that is not a state. It is controlled by the U.S. federal government and must follow U.S. laws. People living in most territories are U.S. citizens, but they cannot vote for the president and do not have full voting representation in Congress. The five U.S. territories are: Puerto Rico, U.S. Virgin Islands, American Samoa, Northern Mariana Islands, and Guam.

6. The two largest rivers in the USA are the Mississippi River (two thousand three hundred and forty miles) and the Missouri River (two thousand three hundred and forty-one miles).

7. Washington, D.C. is the capital city of the United States. It is not a state and does not belong to any state. Instead, it is a federal district created to serve as the political center of the country.

8. The USA has different types of climate. The north has a cold climate.
   Central areas have a continental climate (cold winters and hot summers). The west coast has a mild oceanic climate.

9. Vegetation and wildlife in the United States depend on climate and landscape.
   In the western part of the country, there are mountains, forests, and dry areas with desert vegetation.
   The central part of the USA is covered by grasslands, called prairies. These areas are home to animals such as bison.
   The eastern regions have many forests that support different animal species.
   In the colder northern areas, forest regions provide habitats for animals like moose.
   The southern part of the country has a warmer climate with wetlands and subtropical vegetation. These areas are suitable for animals such as alligators.
   Overall, plants and animals in the USA live in different regions based on climate and natural environment.

LIVEWORKSHEETS

USA important landmarks:
